PROFESSIONAL SUMMARY

Backend Engineer with 2.5+ years of experience building scalable microservices and backend platforms using Java, Spring Boot, PostgreSQL, Redis, Docker, and Kubernetes. Proficient in designing REST APIs, optimizing database performance, implementing caching strategies, and developing high-performance search systems. Experienced in collaborating across engineering teams to deliver reliable, maintainable, and production-ready software with a strong focus on scalability, observability, and clean code practices.

EDUCATION

•Indian Institute of Information Technology (IIIT), Sonapat

8.2

Bachelor of Technology in Computer Science and Engineering

2019 – 2023

EXPERIENCE

•Software Engineer

Feb. 2024 - present

Deloitte

Gurgaon, India

- Designed and developed scalable backend microservices using **Spring Boot** and **Python**, exposing REST APIs consumed by enterprise applications.
- Developed asynchronous backend workflows using **Kafka** for event-driven communication between services, enabling reliable processing of high-volume background operations.
- Implemented **Redis** caching for frequently accessed data, significantly reducing database load and improving API response latency.
- implemented a custom **Search engine** using inverted indexing, Trie-based autocomplete, improving search relevance and reducing query latency by 70%.
- Worked with **JPA/Hibernate** for ORM and **MySQL/PostgreSQL** as backend databases to build robust, persistent data layers.
- Implemented **JWT-based authentication** and Spring Security to ensure secure user access and authorization.
- Containerized backend services using **Docker** and deployed applications through **Kubernetes**-based **CI/CD** pipelines.

•Software Development (SDE) Intern

Jan 2022 - Jun 2022

Maven Lifecare Technologies (Curer)

Remote

- Designed and integrated offline flow for doctor appointments using **Rest APIs** with **Angular.js**.
- Implemented video consultation and real time messaging feature through **Agora** and **Firestore**.
- Implemented reusable React components and hooks to streamline development and maintain consistency across the application.
- Acquired knowledge of different tools like **Jira**, **Notion**, **Git** with Linux environment with team of 20+ member

PROJECTS

•VoiceNote

Feb. 2025 - Mar. 2025

Voice-to-Text Note-Taking Application

Demo

•Stock market Price prediction

Mar. 2021 - Dec. 2021

Web app hosted on stream lit to predict stocks future upto 80% accurate

TECHNICAL SKILLS

- **Programming:** C++, Java, Python, SQL, JavaScript, HTML, CSS
- **Tools/Frameworks:** React, Redux, Redis, Node.js, SpringBoot, PostgreSQL, MongoDB, Cursor, Postman

ACHIEVEMENTS

• **Coding Profile**, LeetCode-400+ problem, CodeChef-1730 rating, GeekforGeeks-200+ problem

• **Contest Ranks**, CodeChef Nov. Lunchtime 295 Global Rank

• **JEE-Mains**, Achieved Rank in top 1.5 percentile

Jun. 2019

• **FlipKart Grid 4.0 (Pre-Finalist)**, Worked on Open Source Software (OSS) Security Inspector

Aug. 2022

• **IIT-Delhi (Camerathon)**, First in IIT-Delhi rendezvous Camerathon 2019

Nov. 2019
