PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years shipping Java/Spring Boot microservices and React/Redux SPAs at Deloitte. Production experience with JPA/Hibernate, PostgreSQL, JWT/Spring Security. Competitive programmer (LeetCode 400+, CodeChef 1730). Want to build reliable, high-ownership backend at a product company.

EDUCATION

• **Indian Institute of Information Technology (IIIT), Sonapat** 8.2
Bachelor of Technology in Computer Science and Engineering 2019 – 2023

EXPERIENCE

- **Software Engineer** Feb. 2024 - present
Deloitte Gurgaon, India
- Developed dynamic and responsive single-page applications (SPAs) using **React.js, Redux** improving load time by 30% and enhancing user experience
 - Designed and developed scalable and secure RESTful APIs using **Spring Boot**, supporting frontend applications and third-party integrations.
 - Worked with JPA/Hibernate for ORM and **MySQL/PostgreSQL** as backend databases to build robust, persistent data layers.
 - Implemented **JWT-based authentication** and Spring Security to ensure secure user access and authorization.
 - implemented a custom **Search engine** using inverted indexing, Trie-based autocomplete, improving search relevance and reducing query latency by 70%.
 - Containerized applications using **Docker** and deployed services in containerized environments, working with **Kubernetes** based deployment pipelines.
- **Software Development (SDE) Intern** Jan 2022 - Jun 2022
Maven Lifecare Technologies (Curer) Remote
- Designed and integrated offline flow for doctor appointments using **Rest APIs** with **Angular.js**.
 - Implemented video consultation and real time messaging feature through **Agora** and **Firebase**.
 - Implemented reusable React components and hooks to streamline development and maintain consistency across the application.
 - Acquired knowledge of different tools like **Jira**, **Notion**, **Git** with Linux environment with team of 20+ member

PROJECTS

- **VoiceNote** Feb. 2025 - Mar. 2025
Voice-to-Text Note-Taking Application Demo
- Built a browser-only voice-to-text notes app using the Web Speech API (no backend) — streamed recognition events into a React reducer with optimistic updates.
 - Implemented efficient state management for real-time note creation, editing, and organization without relying on external libraries
- **Stock market Price prediction** Mar. 2021 - Dec. 2021
Web app hosted on stream lit to predict stocks future upto 80% accurate
- Forecasting stock prices using 2 python libraries Numpy, Pandas
 - Integrated a RNN (LSTM) model trained by the 100% real data of Yahoo finance
 - Built on Stream lit and used Matplotlib library for data visualization which is upto 80% accurate

TECHNICAL SKILLS

- **Programming:** C++, Java, Python, SQL, JavaScript, HTML, CSS
- **Tools/Frameworks:** React, Redux, Redis, Node.js, SpringBoot, PostgreSQL, MongoDB, Cursor, Postman

ACHIEVEMENTS

- **Coding Profile**, LeetCode-400+ problem, CodeChef-1730 rating, GeekforGeeks-200+ problem
- **Contest Ranks**, CodeChef Nov. Lunchtime 295 Global Rank
- **JEE-Mains**, Achieved Rank in top 1.5 percentile Jun. 2019
- **FlipKart Grid 4.0 (Pre-Finalist)**, Worked on Open Source Software (OSS) Security Inspector Aug. 2022
- **IIT-Delhi (Camerathon)**, First in IIT-Delhi rendezvous Camerathon 2019 Nov. 2019
